wing disc development
ventral cord development
tube morphogenesis
tube development
translation
transcription initiation from RNA polymerase II promoter
tissue morphogenesis
tissue development
taxis
system development
syncytial blastoderm mitotic cell cycle
striated muscle cell differentiation
stem cell differentiation
spindle organization
spindle microtubule assembly
spindle assembly
SMAD protein import into nucleus
sister chromatid segregation
single−organism nuclear import
single−organism developmental process
single−organism cellular process
single−multicellular organism process
single organism signaling
single organism reproductive process
sex differentiation
sex determination, establishment of X:A ratio
sensory organ morphogenesis
sensory organ development
sensory organ boundary specification
salivary gland morphogenesis
RNA processing
RNA splicing, via transesterification reactions
RNA splicing
RNA metabolic process
ribosome biogenesis
ribonucleoprotein complex localization
ribonucleoprotein complex export from nucleus
ribonucleoprotein complex biogenesis
response to stress
response to stimulus
response to nutrient levels
response to external stimulus
response to abiotic stimulus
reproductive system development
reproductive structure development
reproductive process
reproduction
regulation of transcription, DNA−templated
regulation of transcription from RNA polymerase II promoter
regulation of RNA splicing
regulation of RNA metabolic process
regulation of RNA biosynthetic process
regulation of primary metabolic process
regulation of nucleobase−containing compound metabolic process
regulation of nucleic acid−templated transcription
regulation of nitrogen compound metabolic process
regulation of RNA processing
regulation of mitotic nuclear division
regulation of mitotic cell cycle phase transition
regulation of mitotic cell cycle
regulation of metabolic process
regulation of macromolecule metabolic process
regulation of macromolecule biosynthetic process
regulation of immune system process
regulation of gene expression
regulation of G2/M transition of mitotic cell cycle
regulation of defense response
regulation of cytoskeleton organization
regulation of cellular process
regulation of cellular macromolecule biosynthetic process
regulation of cellular biosynthetic process
regulation of cell fate specification
regulation of cell cycle process
regulation of cell cycle phase transition
regulation of cell cycle G2/M phase transition
regulation of cell cycle
regulation of biosynthetic process
regulation of biological quality
regulation of biological process
regulation of alternative mRNA splicing, via spliceosome
reproduction
pyrimidine−containing compound metabolic process
pyrimidine nucleoside triphosphate metabolic process
protein targeting to nucleus
protein localization to nucleus
protein localization to nuclear envelope
protein import
protein export from nucleus
primary metabolic process
post−embryonic development
post−embryonic animal organ morphogenesis
post−embryonic animal organ development
post−embryonic animal morphogenesis
positive regulation of transcription, DNA−templated
positive regulation of transcription from RNA polymerase II promoter
positive regulation of RNA metabolic process
positive regulation of RNA biosynthetic process
positive regulation of nucleobase−containing compound metabolic process
positive regulation of nucleic acid−templated transcription
positive regulation of nitrogen compound metabolic process
positive regulation of metabolic process
positive regulation of macromolecule metabolic process
positive regulation of macromolecule biosynthetic process
positive regulation of gene expression
positive regulation of cellular process
positive regulation of cellular biosynthetic process
positive regulation of biosynthetic process
positive regulation of biological process
pole plasm assembly
phototransduction
photoreceptor cell fate specification
peptide biosynthetic process
organonitrogen compound metabolic process
organic substance biosynthetic process
organic cyclic compound metabolic process
organelle organization
organelle fission
organelle assembly
oogenesis
nucleus organization
nucleoside metabolic process
nucleocytoplasmic transport
nucleobase−containing compound metabolic process
nucleobase−containing compound biosynthetic process
nucleic acid−templated transcription
nucleic acid metabolic process
nuclear transport
nuclear export
nuclear division
nuclear chromosome segregation
nitrogen compound metabolic process
neuron projection morphogenesis
neuron projection development
neuron fate specification
neuron differentiation
neurogenesis
neuroblast differentiation
neural retina development
nervous system development
negative regulation of transcription, DNA−templated
negative regulation of RNA metabolic process
negative regulation of RNA biosynthetic process
negative regulation of nucleobase−containing compound metabolic process
negative regulation of nuclear division
negative regulation of gene expression
negative regulation of mitotic sister chromatid segregation
negative regulation of mitotic sister chromatid separation
negative regulation of mitotic cell cycle phase transition
negative regulation of mitotic cell cycle
negative regulation of metabolic process
negative regulation of macromolecule metabolic process
negative regulation of gene expression
negative regulation of G2/M transition of mitotic cell cycle
negative regulation of chromosome segregation
negative regulation of chromosome organization
negative regulation of cellular process
negative regulation of cellular metabolic process
negative regulation of cellular macromolecule biosynthetic process
negative regulation of cellular biosynthetic process
negative regulation of cell cycle process
negative regulation of cell cycle phase transition
negative regulation of cell cycle G2/M phase transition
negative regulation of canonical Wnt signaling pathway
negative regulation of biosynthetic process
negative regulation of biological process
mRNA metabolic process
muscle structure development
muscle organ development
multicellular organism development
multicellular organism process
multi−organism process
mRNA splicing, via spliceosome
mRNA processing
mRNA export from nucleus
morphogenesis of an epithelium
mitotic sister chromatid segregation
mitotic spindle assembly checkpoint
mitotic spindle organization
mitotic sister chromatid separation
mitotic nuclear division
mitotic G2/M transition checkpoint
mitotic G2 DNA damage checkpoint
mitotic DNA integrity checkpoint
mitotic DNA damage checkpoint
mitotic cytokinesis
mitotic cell cycle process
mitotic cell cycle phase transition
mitotic cell cycle checkpoint
mitotic cell cycle
microtubule−based process
microtubule organizing center organization
microtubule cytoskeleton organization
metaphase plate congression
metanephros development
metaphase
metabolic process
mesoderm development
meiotic cytokinesis
male genitalia development
macromolecule biosynthetic process
leg disc pattern formation
leg disc development
JAK−STAT cascade
instar larval or pupal morphogenesis
instar larval or pupal development
imaginal disc−derived wing vein morphogenesis
imaginal disc−derived leg morphogenesis
imaginal disc−derived appendage development
imaginal disc morphogenesis
imaginal disc development
histone modification
heterocycle metabolic process
heart development
gonad development
gland development
generation of neurons
gene silencing
gene expression
gamete generation
female meiotic division
eye−antennal disc morphogenesis
eye−antennal disc development
eye development
establishment of localization in cell
establishment of chromosome localization
epithelium development
epithelial tube morphogenesis
embryo development
eggshell chorion gene amplification
dorsal/ventral axis specification, ovarian follicular epithelium
DNA−dependent DNA replication
DNA replication initiation
DNA repair
DNA metabolic process
DNA integrity checkpoint
DNA damage checkpoint
DNA biosynthetic process
DNA amplification
developmental process involved in reproduction
developmental process
dendrite morphogenesis
cytoskeleton−dependent cytokinesis
cytoskeleton organization
cytoplasmic translation
cuticle development
compound eye morphogenesis
compound eye development
circulatory system development
chromosome segregation
chromosome organization
chromosome localization
chromatin remodeling
chromatin organization
chitin−based cuticle development
chitin biosynthetic process
cardia development
centrosome organization
centrosome duplication
centrosome cycle
centromere complex assembly
central nervous system development
cellular response to stress
cellular response to stimulus
cellular response to starvation
cellular response to oxidative stress
cellular response to DNA damage stimulus
cellular protein metabolic process
cellular protein localization
cellular process involved in reproduction in multicellular organism
cellular process
cellular nitrogen compound metabolic process
cellular nitrogen compound biosynthetic process
cellular metabolic process
cellular macromolecule metabolic process
cellular macromolecule localization
cellular macromolecule biosynthetic process
cellular localization
cellular homeostasis
cellular developmental process
cellular component organization or biogenesis
cellular component organization
cellular component morphogenesis
cellular component organization
cellular component assembly involved in morphogenesis
cellular component assembly
cellular biosynthetic process
cellular aromatic compound metabolic process
cellular amide metabolic process
cell surface receptor signaling pathway
cell projection organization
cell projection morphogenesis
cell part morphogenesis
cell morphogenesis involved in neuron differentiation
cell morphogenesis involved in differentiation
cell fate specification
cell fate commitment involved in pattern specification
cell fate commitment
cell differentiation
cell development
cell cycle process
cell cycle phase transition
cell cycle G2/M phase transition
cell cycle checkpoint
cell cycle
cell communication
cardiocyte differentiation
camera−type eye development
biosynthetic process
biological regulation
axonogenesis
axis specification
ATP−dependent chromatin remodeling
appendage morphogenesis
appendage development
anterior head segmentation
antennal lobe development
antennal development
animal organ morphogenesis
animal organ development
anatomical structure morphogenesis
anatomical structure formation involved in morphogenesis
anatomical structure development
aminoacyl−tRNA catabolic process
amino sugar biosynthetic process
amine biosynthetic process
actomyosin structure organization
