

Regeneration *Drosophila melanogaster*
new RNAseq samples sequenced at the CRG

06/01/2016

Outline

Overview of RNA-seq samples

Mapping statistics

Correlation between replicates

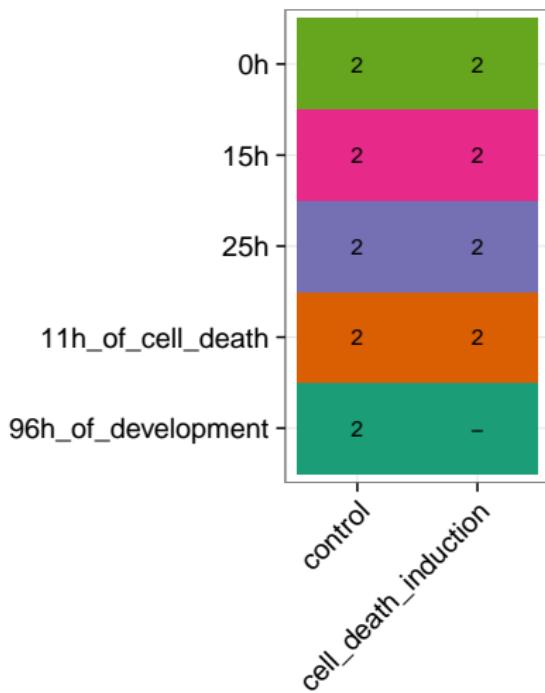

Comparison between ERC wing disc and 96h control

PCA and Clustering

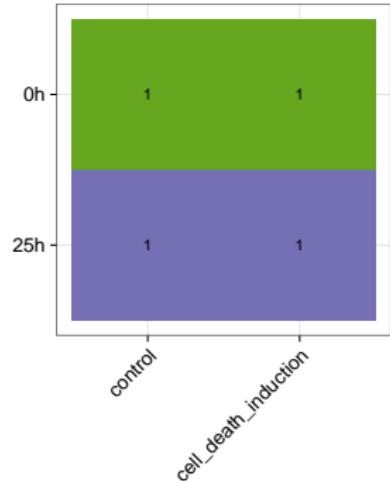

Control genes

RNAseq samples

Samples sequenced in India

Samples sequenced at the CRG

Outline

Overview of RNA-seq samples

Mapping statistics

Correlation between replicates

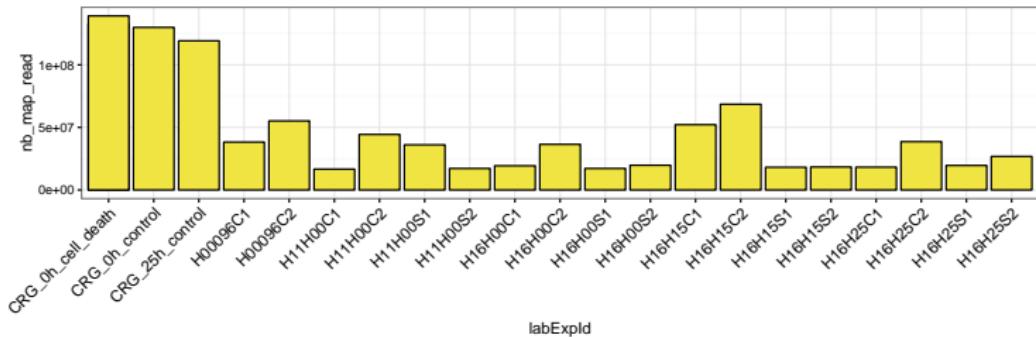

Comparison between ERC wing disc and 96h control

PCA and Clustering

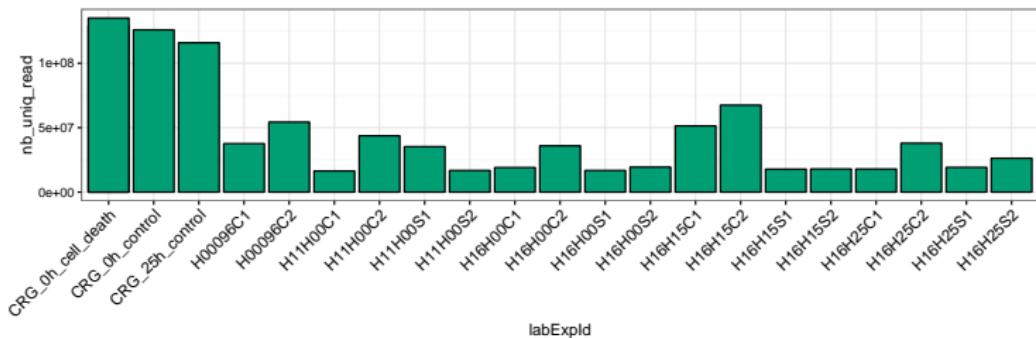

Control genes

Mapping statistiques

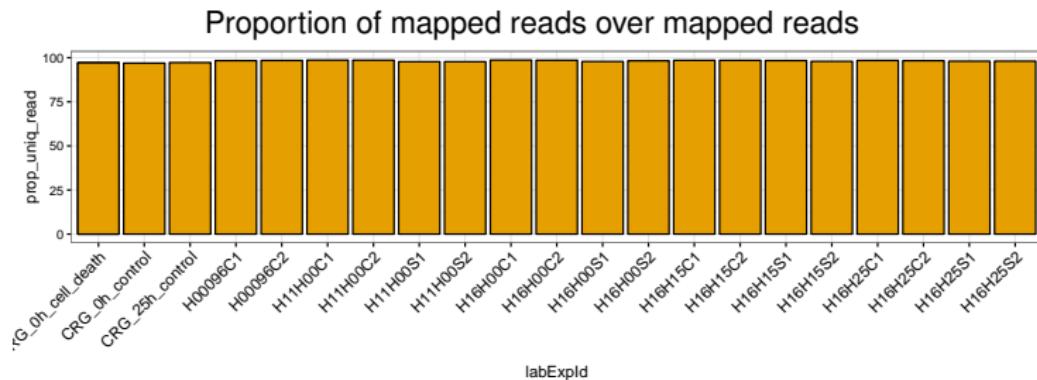

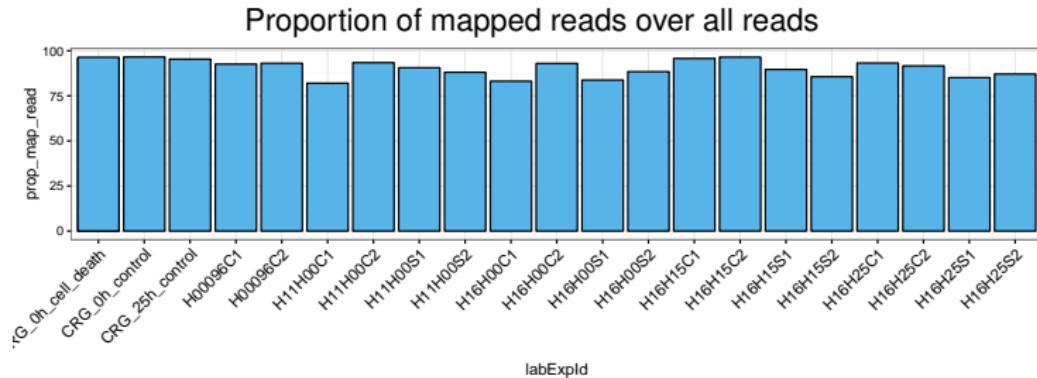

Number of mapped reads

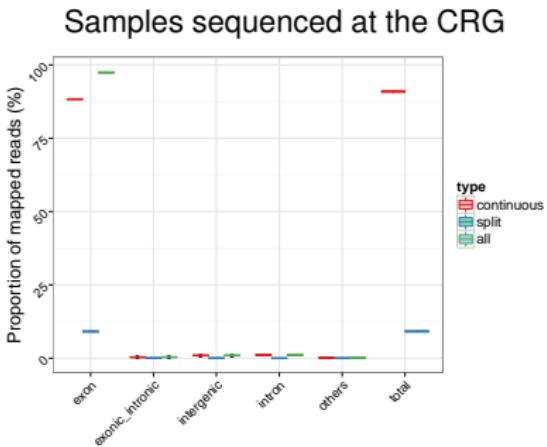

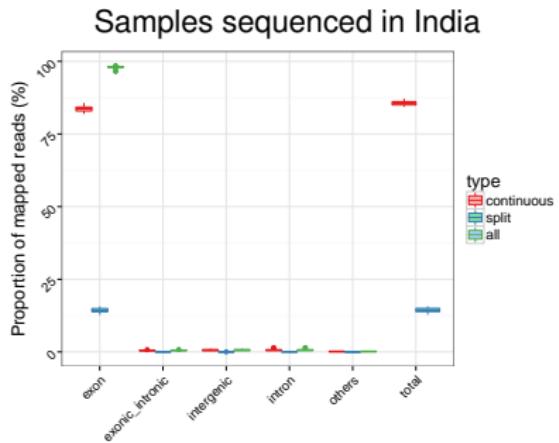

Number of uniquely mapped reads

Mapping statistiques

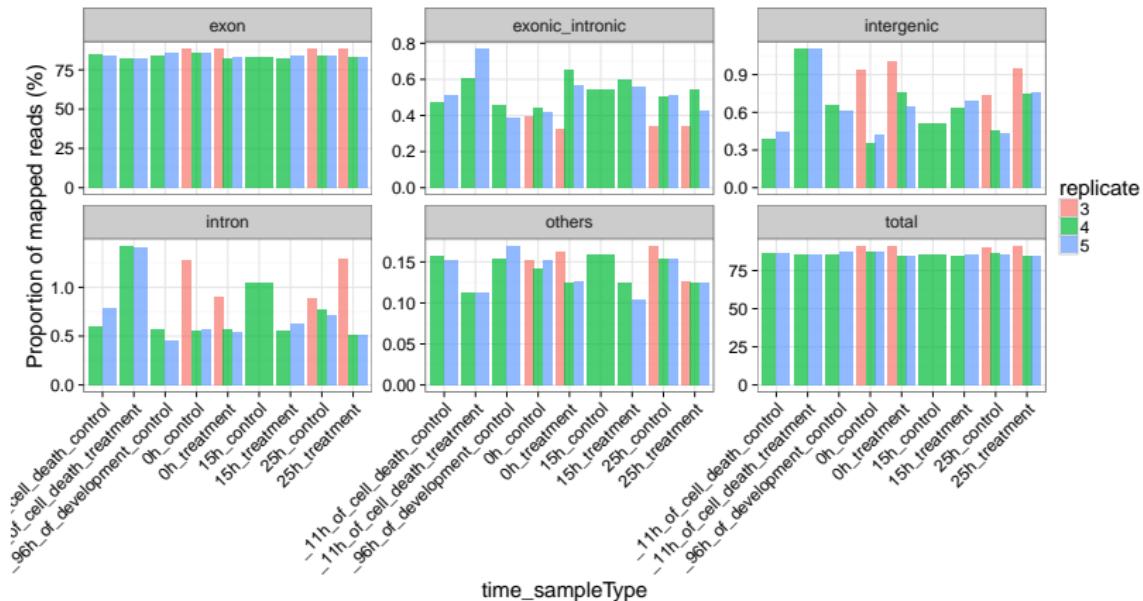

Genomic regions

Genomic regions - continuous mapping

Replicates 4 and 5 = Samples sequenced in India

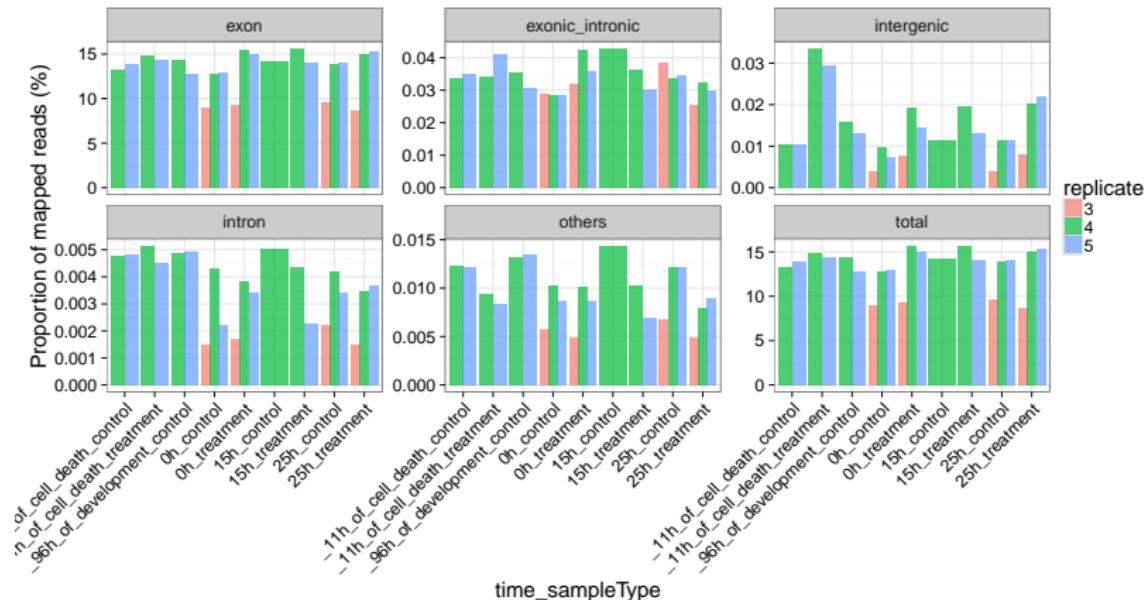

Replicate 3 = Samples sequenced at the CRG

Genomic regions - split mapping

Replicates 4 and 5 = Samples sequenced in India

Replicate 3 = Samples sequenced at the CRG

Outline

Overview of RNA-seq samples

Mapping statistics

Correlation between replicates

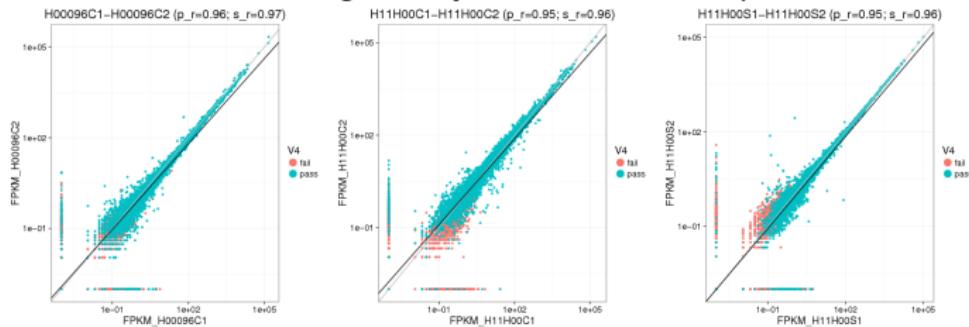

Comparison between ERC wing disc and 96h control

PCA and Clustering

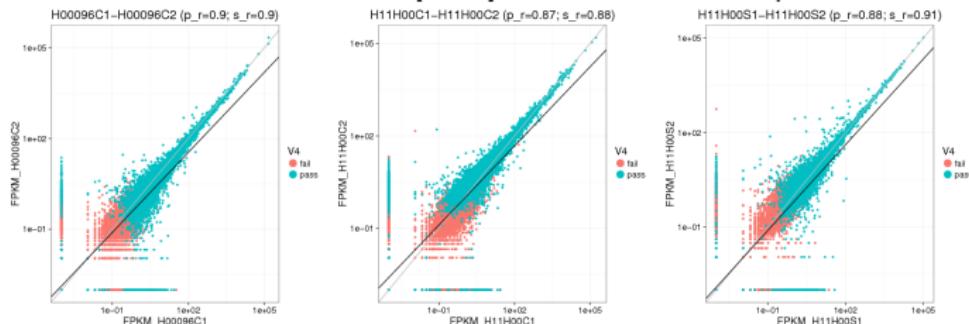

Control genes

96h control and 11h cell death

Correlation of gene expression between replicates

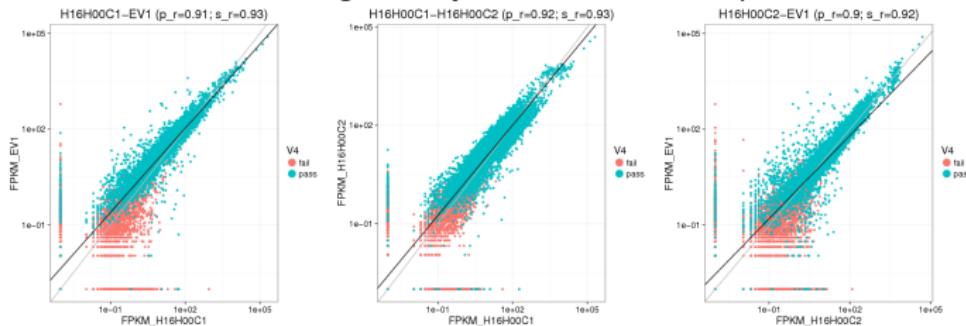

Correlation of transcript expression between replicates

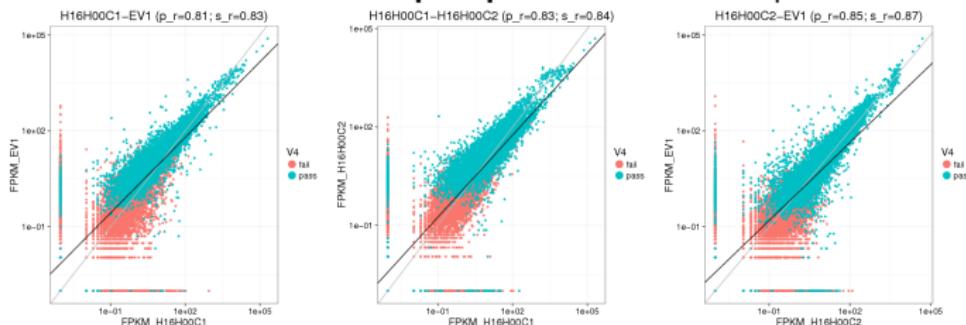

0h control

Correlation of gene expression between replicates

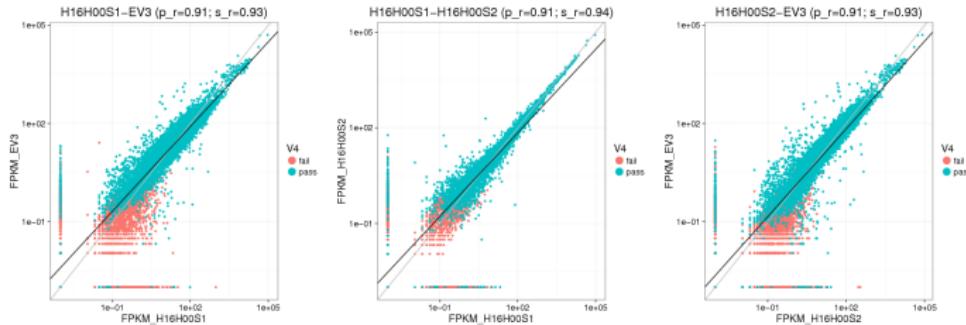

Correlation of transcript expression between replicates

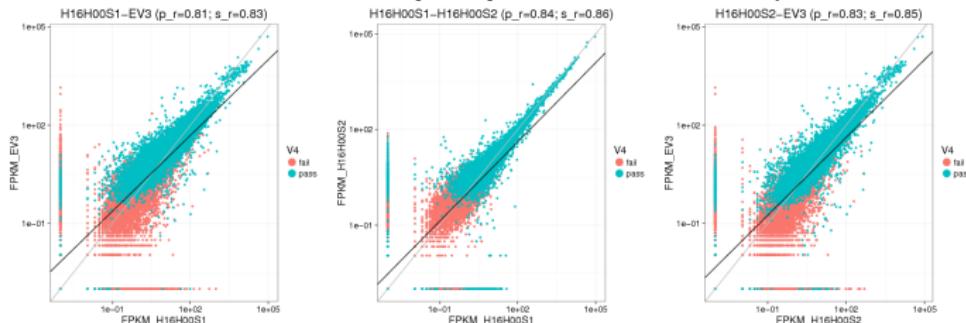

0h cell death

Correlation of gene expression between replicates

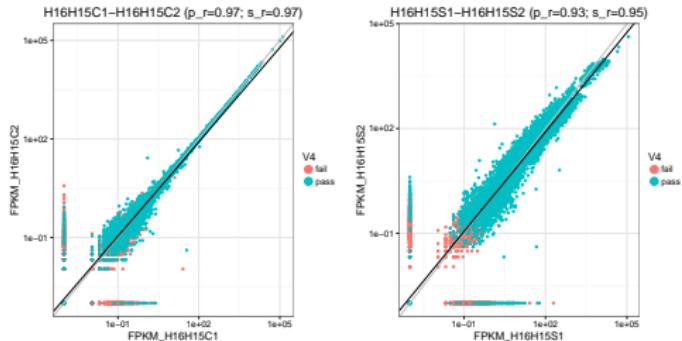

Correlation of transcript expression between replicates

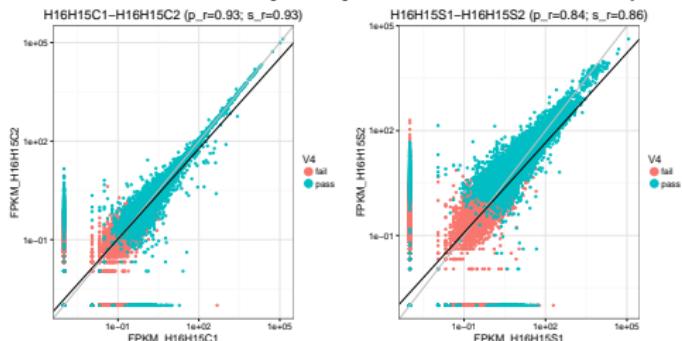

15h control and cell death - not sequenced in CRG

Correlation of **gene expression** between replicates

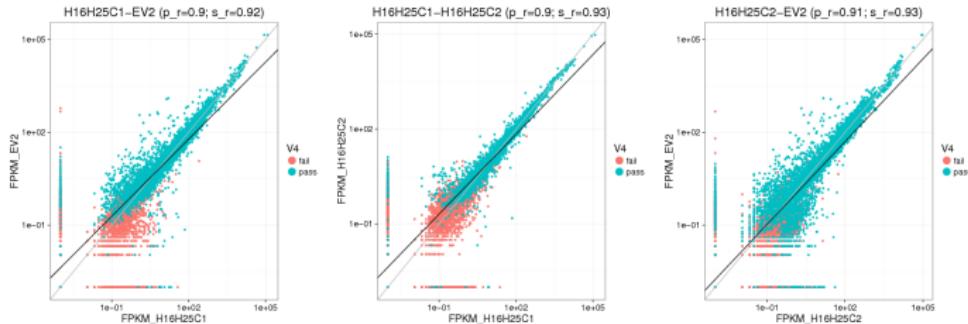

Correlation of **transcript expression** between replicates

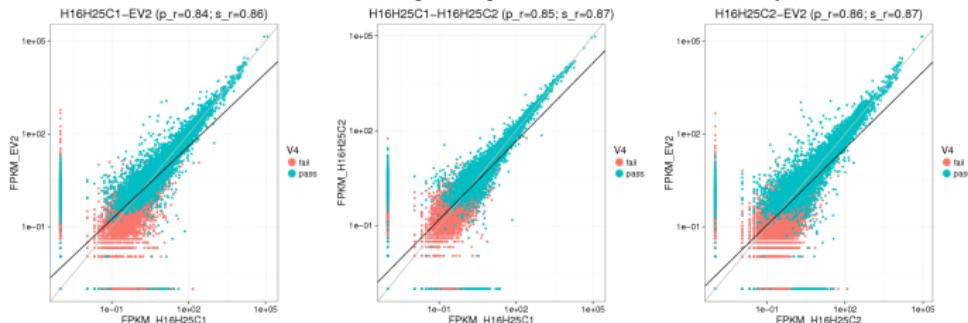

25h control

Correlation of gene expression between replicates

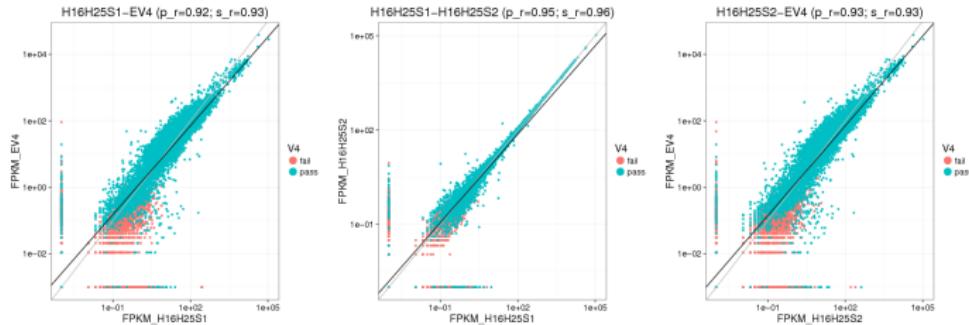

Correlation of transcript expression between replicates

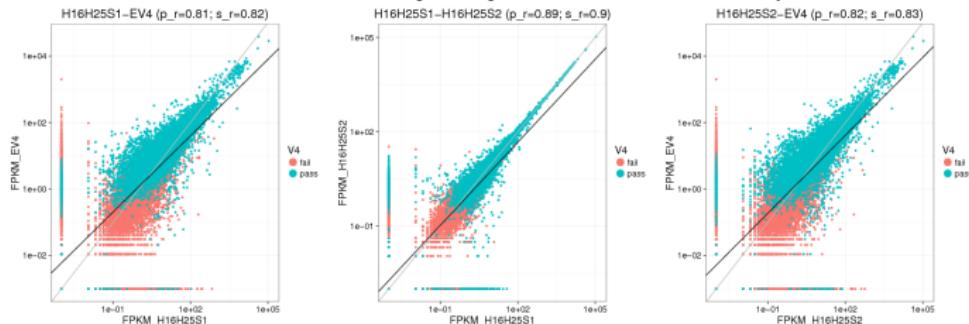

25h cell death

Correlation of gene expression between replicates

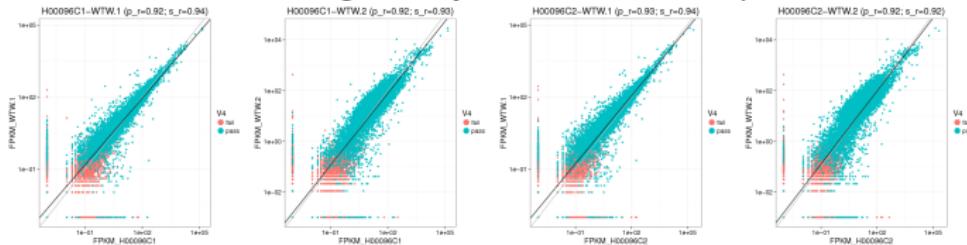

Correlation of transcript expression between replicates

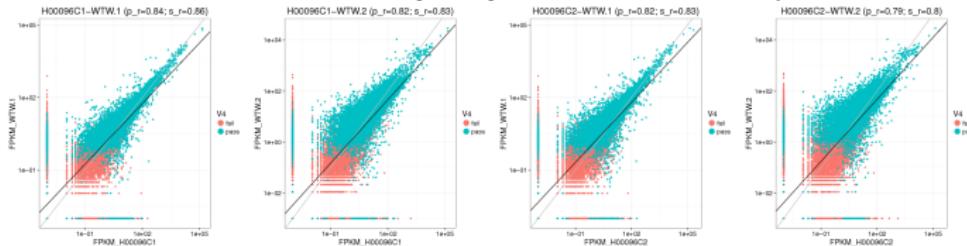

Comparison between ERC wing disc and 96h control

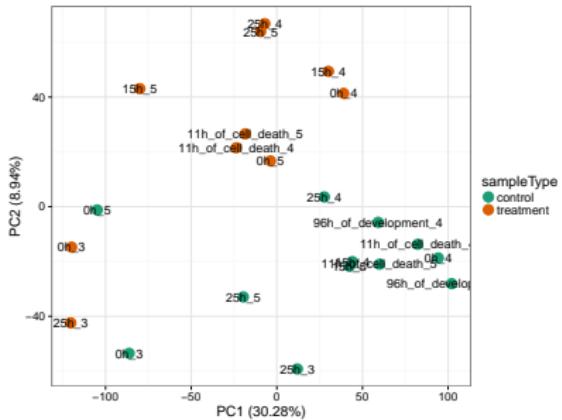

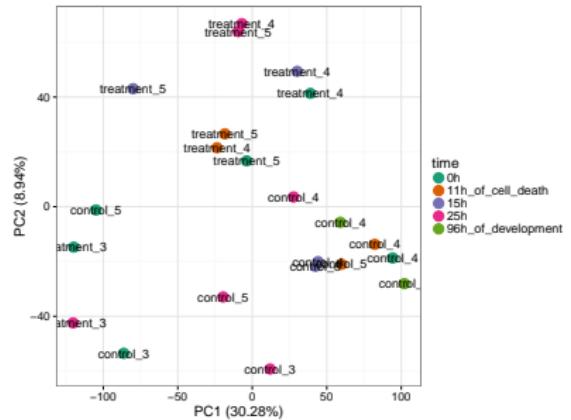

Correlation of gene expression between replicates

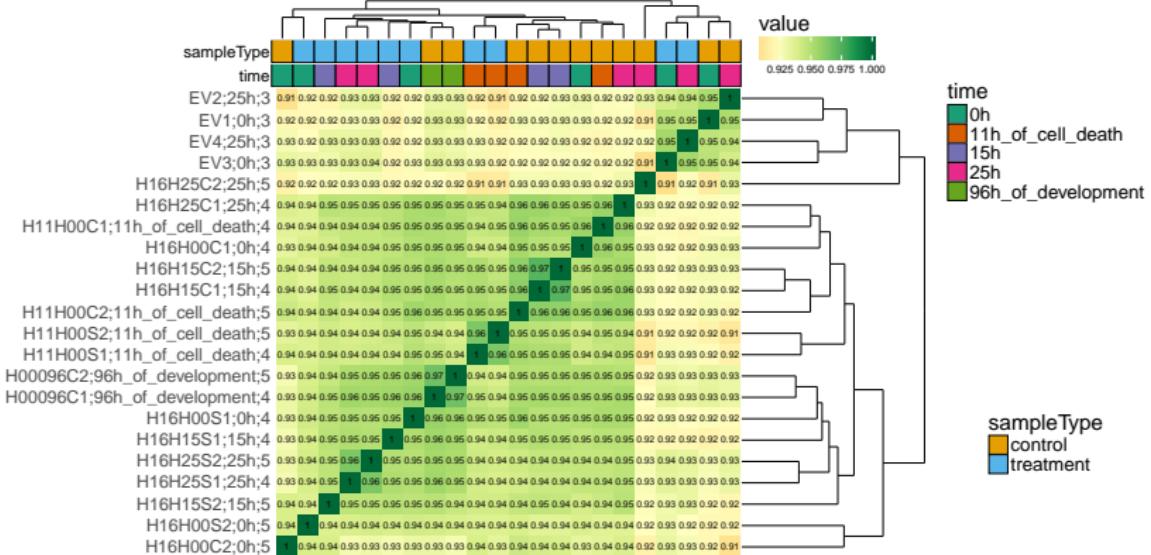

Correlation of transcript expression between replicates

PCA and Clustering

PCA and Clustering

Control genes
